CRACKBOTICS

CUSTOM CNC ALUMINUM
FOR FTC TEAMS · SAN DIEGO

STOP OVERPAYING FOR ALUMINUM.

1/8 in. plates and custom 3D printed parts on an **8 mm grid** — made by FTC students, priced well under **the big suppliers**, and made in **1–3 business days**.

Way cheaper	1–3 business days	No minimums
We heavily undercut the big suppliers on the same parts.	To make your parts, before shipping. Free San Diego pickup.	One bracket or a full set of plates — both are fine.

WHAT WE MAKE

1/8 in. plates

6061 aluminum or polycarbonate. Custom outlines, pockets, tapped holes.

3D printed parts

Custom, printed to order. Guides, spacers, mounts and housings.

Built by students from Runtime Terror (FTC #22105) and All Systems Go (FTC #21239) — two of the strongest programs in San Diego and Kentucky. We've waited on the same overpriced parts you have. Send a DXF or a STEP file and we'll quote it same day.
